DETERMINATION OF DEMAND:

Secondary Service:

The monthly billing demand kW shall be either the greatest connected load or the greatest 15-minute integrated demand, determined as follows:

- (a) Billing demand may be on a connected load basis when:
 - (1) a demand meter would not reduce the billing demand, or
 - (2) the installation is temporary, or
 - (3) the device has a large instantaneous or highly fluctuating demand.
- (b) Billing shall be on a demand meter basis in all other cases and shall be billed at not less than 90% of the kVA demand, nor less than 50% of the highest demand in any of the preceding eleven months.

Primary Service:

The demand for each month shall be the highest 15-minute integrated kW demand determined during the month by the use of a suitable demand indicator, but not less than 90% of the kVA demand. The monthly demand charge shall be based upon this figure except that it shall never be based upon a figure less than 50% of the highest demand in any of the preceding eleven months, or the contract minimum, or 200 kW whichever is the greatest.

General:

Where the customer's load is highly fluctuating and instantaneous, requiring additional transformer capacity, the billing demand shall be equal to the rated transformer capacity required to supply the load.

TERMS OF PAYMENT:

Bills are due and payable on or before fifteen days from date bill is mailed to customer. If bill is not paid within fifteen days service may be discontinued after suitable written notice.

TERM:

Secondary service is terminable at any time after six months unless a longer period is required under a line extension agreement.

Primary service is terminable at any time after one year upon ninety days written notice. The Company reserves the right to require a longer initial term where special construction is required to furnish the service.

SPECIAL PROVISIONS:

A. SHORT TERM SECONDARY SERVICE:

When short term service is requested, the Company reserves the right to require a deposit of the estimated bill for the period service is desired. The minimum charge for such short term service shall be an amount equal to six times the minimum monthly charge, payable in advance. When construction is necessary, the cost of installation and removal of all equipment, less salvage value, shall be borne by the customer, and a sufficient amount to cover these charges shall be paid in advance. A part of a month shall be considered a full month for computing all charges hereunder.

B. SPACE HEATING:

Customers who take service under this Service Classification for 10 kW or more of permanently installed space heating equipment may elect to have the electricity for this service billed separately. All monthly use will be billed at the following rates:

| | | |
|-----------------|-----------------|-----|
| Delivery Charge | 3.8971¢ per kWh | (I) |
|-----------------|-----------------|-----|

When this option is requested, it shall apply for at least 12 months and shall be subject to a minimum charge of \$60.00 per year per kW of space heating capacity. This rule applies for both heating and cooling where the two services are combined by the manufacturer in a single self-contained unit.

All usage under this Special Provision shall also be subject to Parts (4) and (5) of RATE - FIVE PART - MONTHLY.
