

Stay safe.

Contact 811 at least two days before any digging project at your home. It's the law.

oru.com/811

Whether you're installing a swing set, putting in a pool—or planning any project that involves digging—**contact 811 first. It's the law.**

Once you contact 811, utilities will send someone to identify and mark what's underground so you can avoid damaging infrastructure. Please call at least two days before you plan to start your project.

Staying safe doesn't end with the call. Once the marks are made, safe digging is the next step:

- Dig carefully using hand tools within two feet of those marks.
- Accidentally striking an underground line can lead to property damage, costly repairs and injury.

**Request a
mark out online**
