

# Clean Energy. Clean Environment.

---

We're making a commitment to build and operate a reliable, resilient, and innovative energy infrastructure. The goal is to advance away from fossil fuels to a net-zero economy by 2050.

We'll reach that goal by:

- Building a resilient electric grid that delivers 100% clean energy by 2040.
- Empowering all of our customers to meet their climate goals.
- Reimagining the gas system.
- Reducing our carbon footprint.
- Partnering with our stakeholders.
- Switching to renewable energy sources.

## Save with Rebates and Incentives

Whether you're a business or homeowner, our energy-efficiency experts can provide the resources and incentives to help you make energy efficiency a way of life.

**Homeowners and renters.** Offset the costs for energy-efficiency equipment and appliances. Plus, enjoy great deals and convenient shipping on LED bulbs, home tech and more at [myORUstore.com](http://myORUstore.com)

**Businesses.** From big industrial complexes to small specialty shops, we can help you save on your energy costs with both custom and prescriptive energy-efficiency programs.

See the opportunities to save at [oru.com/save](http://oru.com/save). Once you land there go to your state – either NY or NJ – to see unique offerings.
