

## Bills Could Go Up as Supply Costs Rise This Summer

---

Warmer weather typically means higher energy bills. But, this summer, the increase may be more than usual.

Rising energy supply costs driven, in part, by global unrest are a leading factor. Weather conditions and your individual usage also affect your bill.

## Here are some ways to help manage your energy bills:

- 1 Spread payments out evenly across the year:** A Budget Billing plan might help you avoid large month-to-month changes in energy costs.
- 2 Consider a Payment Agreement:** A Payment Agreement can help you pay down an outstanding balance in manageable, monthly installments.
- 3 Check your benefits:** If you're enrolled in assistance programs, you may be eligible for discounts on your energy bills through our Energy Affordability Program.
- 4 Manage your usage:** Get an in-depth look at your hourly energy usage by registering for My Account and logging in via [oru.com](http://oru.com) or our mobile app.
