

Orange and Rockland (O&R) Electric Vehicle (EV) Time of Use (TOU) Rate Application (New York)

This application is for [Orange & Rockland's Service Class \(SC\) 19 EV TOU Rates](#) for residential customers with Plug-in Electric Vehicles¹ ("PEV") with the following options: (1) the residential TOU rate for the entire residence with a one-year price guarantee, or (2) the residential TOU rate applicable to a separate account established solely for PEV charging along with installation of a second meter. For both options, the SC 19 EV TOU Rates are the same as the existing SC 19 Voluntary Time of Use Rate with the monthly customer charge of \$32.00 reduced to the SC 1 residential rate monthly customer charge of \$19.50. The SC 19 EV TOU Rates are only applicable to the monthly customer charge and the energy delivery charge component of your monthly bill and do not impact the energy supply component. Please refer to the following web page for the current SC 19 EV TOU Rates²: [\[New York Rates & Tariffs\]](#).

To be eligible for this rate under either option, an O&R customer must have a New York State registered PEV and must register the PEV with O&R by providing a copy of the State vehicle registration. A customer who takes the SC 19 TOU rate must remain on the rate for a minimum of 12 months. Customers who wish to remain on the rate after one year may be asked to re-send the State vehicle registration for the PEV at that time and every 12 months thereafter by O&R, and failure to do so may result in the customer being removed from the rate.

The following are additional requirements to request service under the respective options:

- (1) To request the *residential TOU* rate with a one-year price guarantee, fill out the application below and email it along with a copy of your State vehicle registration to EV@oru.com. O&R will process your application, if you are not eligible O&R will notify you and if you are eligible O&R will notify when the billing on your account is changed to the SC 19 EV TOU rate. After you have been billed on this rate for 12 months, O&R will compare what you paid under time-of-use rates with what you would have paid under a standard residential rate. If you paid more than what you would have paid under the standard residential rate, O&R will credit your account for the difference. If you paid less, you keep the savings. O&R will send a summary email to you detailing the results of your price guarantee, at which time you can chose to be removed from the SC 19 EV TOU rate as of the anniversary date of being put on the rate. **THE PRICE GUARANTEE IS ONLY APPLICABLE TO THE FIRST YEAR OF PARTICIPATION.**
- (2) To request the *second meter for electric vehicles only* rate, you must install a separate residential revenue-grade meter solely to charge your electric vehicle, even if you live in an apartment complex. You will need to hire a licensed electrician to do the necessary wiring, and to install a new meter pan and panel, subject to approval by O&R. You will then be able to separately meter your electric vehicle using a time-of-use rate, which can reduce off-peak charging costs. You will not be eligible for the one-year price guarantee under this option. If you are considering this rate option, please fill out the application below and email it along with your State vehicle registration for the PEV to EV@oru.com and, if applicable, please include information about any active application with O&R's New Business Unit pending and/or advise if a separate meter for PEV charging has already been installed at the subject residence. Upon receipt of this application and accompanying information, O&R will reach out to you to discuss the details of your situation and help you navigate this rate option.

¹ Plug-in Electric Vehicle ("PEV") is defined as a Plug-in Hybrid Electric Vehicle ("PHEV") and a Battery Electric Vehicle ("BEV")

² SC 19 TOU Rates are subject to increase in accordance with the applicable tariff, as such tariff may be modified from time to time.
