STATEMENT OF UNDERGROUND RESIDENTIAL DISTRIBUTION CONTRIBUTION

ORANGE AND ROCKLAND UTILITIES, INC.

Pursuant to General Information Sections 3.8 and 5.1, the following charges are applicable for lines required to provide electric service to a residential subdivision:

Contribution by Applicant

Underground Supply Circuit	$12.89	per trench foot
Underground Distribution Line	$29.71	per trench foot for single phase service
Underground Service Lateral	$11.33	per trench foot

Trenching Credit

If applicant elects to excavate the trench necessary for an underground installation of distribution lines, the applicant shall receive the following credit per trench foot, consistent with the footage allowance set forth in General Information Section No. 3.7.

Trenching Credit	$21.11	per trench foot

Incremental Three-Phase Charge

The incremental charge for three-phase line as applicable, shall be $8.76 per trench foot.

Appurtenant Entitlements

Appurtenant facility entitlement costs will be calculated as a pro-rated percentage and will be equal to the entitlement allowance footage divided by total project footage.
