

Case Study

Custom Rebate Program

Overview:

Nestled along the shore of the picturesque and historic Hudson River, the North Rockland Central School District (NRCSD) boasts a vibrant educational landscape that caters to nearly 8,000 students across nine diverse schools in Rockland County, New York.

North Rockland prepares students for life by providing innovative academic programming, and award-winning extracurriculars that enable each child to excel and succeed. NRCSD is strongly committed to creating a cleaner energy future for its students and community at large, which is evident by their work to enhance the efficiency of their facilities.

Through their use of the cost-effective Commercial and Industrial (C&I) Custom Electric and Gas Program, NRCSD was able to upgrade their lighting, refrigeration, demand control ventilation, and heating and cooling systems. They also constructed a new football field and concession stand.

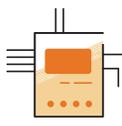

Thanks to the incentives provided by the program, NRCSD was able to transform their school district with improved and comprehensive energy solutions, and they continue to look for ways to further enhance the efficiency and reduce the carbon footprint of their facilities.

Highlights:

- Total Project Cost: > **\$1 million**
- O&R Incentive:..... ~ **\$220,000**
- Est. Annual Energy Savings (kWh): ~ **650,000**
- Est. Annual Energy Savings (therms): : ~ **25,000**

"I would recommend any school district to go down this path - it's not only a win for the environment, but it's a win for the students and it's a win for the community."

Kris Felicello, ED. D. -
 Superintendent of North Rockland Central School District
